

I am writing to voice my concern over an issue that is very important to me, the NAB's petition 04-160. I drive 400-500 miles a week for my job, and satellite radio has made this drive time much more enjoyable. But what is more important to me are the Weather and Traffic radio stations. Trip times can be cut by many minutes and sometimes hours using the reports I receive through my XM radio. Now I understand this valuable tool has come under fire from the NAB. I would hope that in the spirit of competition and the belief that the FCC is indeed set up by the people for the people, you will listen to the people. I want localized broadcasts through the satellite radio and implre you to REJECT PETITION 04-160 and allow the type of programming I demand and deserve.

Thank You,

Chris Hyman
